

Plant Tissue Culture: An Alternative for Production of Useful Metabolites/FAO

Filesize: 7.79 MB

Reviews

Merely no words and phrases to describe. I really could comprehended almost everything using this created e pdf. Your daily life period will be change once you full reading this ebook.
(Mr. Ladarius Stoltenberg)

PLANT TISSUE CULTURE: AN ALTERNATIVE FOR PRODUCTION OF USEFUL METABOLITES/FAO

Daya Publishing House, 1997. Hardcover. Book Condition: New. Higher plants contain a variety of metabolites that are useful as medicines, food additives, perfumes, etc. Decreased plant resources, increases in labour costs and other problems in obtaining these valuable substances from natural plants have stimulated work in the area of plant cell culture for their production. Studies have been carried out on an increasing scale since the end of the 1950s and the results have stimulated more recent studies on the industrial application of this technology. A skin pigment, shikonin and ginseng cell biomass are currently manufactured in Japan. However, the low productivity of cultured plant cells has kept production costs high; production efficiency must be improved before many other products can be commercialized. This publication reviews the background of plant cell culture research, cost analysis, methods and facilities, various approaches to improving productivity and studies on a number of commercially interesting products that are currently being investigated.;;Contents;Chapter 1: Introduction; Chapter 2: Historical Background; Chapter 3: Cost Analysis; Chapter 4: Materials and Methods; Materials, Plant, Media, Inorganic Salts, Carbon sources, Vitamins; Phytohormones; Organic supplements, Methods, Preparation of media, Callus induction, Suspension culture, Scaling-up; Chapter 5: Equipment and Facilities; Laboratory, Fermenters or bioreactors; Chapter 6: Approaches to Increase Productivity; Optimization of culture conditions, Medium, Temperature, pH, Light and Oxygen, High cell density culture, Absorption of products, Selection of high-producing strains, Additions of precursors and biotransformation, Addition of precursors, Biotransformation, Elicitor treatment, Application of immobilized cells, Product secretion, Metagenesis, Morphological differentiation, Organ culture, Hairy root culture; Chapter 7: Products of Interest to Industry; Pharmaceuticals and biologically active compounds, Alkaloids, Morphinan alkaloids, Berberine, Tropane alkaloids, Cardinolides, L-DOPA, Valeportriates, Antitumour compounds, Camptothecin, Homoharringtonine, Podophyllotoxin, Vinca Alkaloids, Taxol, Ginseng, Rosmarinic acid, Arbutin, Agricultural drugs, Plant virus inhibitors, Food additives, Pigments, Shikonin compounds, Anthocyanins, Safflower Yellow, Saffron,...
