BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 44 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO reviewed the Army's strategy for testing and procuring the Army Tactical Command and Control System (ATCCS), focusing on the preparations for an operational test. GAO found that: (1) the Army will test each ATCCS segment before integration and then measure the network against systemwide requirements; (2) the Army has an individual acquisition strategy, test program, and production and fielding schedule for each segment and will upgrade the software before integrating each segment into the network; (3) the Army plans to start production of the network without testing the automated data exchange between segments and without enhanced communications capabilities, contrary to congressional guidance requiring the Army to procure a fully integrated system; (4) the Army shortened the test schedule for the Maneuver Control System (MCS) and did not allow for sufficient time for personnel to adequately learn how to operate it and incorporate it into standard operating procedures before a planned operational test; (5) contrary to normal practices, the Army deferred development of seven MCS functions, and its operational test will not include the complete software; and (6) the Army plans to field two versions of the computer equipment for the segment, which will increase logistics costs and render one version of the equipment obsolete. This item ships from La Vergne, TN. Paperback.
