

## The Story Of Astronomy

By Jefferson Hane Weaver

Basic Books. Paperback. Book Condition: New. Paperback. 416 pages. Dimensions: 8.3in. x 5.5in. x 0.8in. Trace the development of astronomy from early Greek stargazers to the ambitious pioneers: Brahe, Copernicus, Kepler, and Newton - who braved persecution and ridicule to fight for a science that relied not on ancient authorities and scriptures, but on logic, math, and careful observation. As Motz and Weaver show, the fruits of this noble pursuit - the elegant, simple natural laws - opened our eyes to the elusive rotations of the heavenly bodies, and gave rise to classical physics, and, finally, the vigorous, thriving science of astronomy today. These engaging authors go on to depict the brilliant revolution in astronomy that shattered classical physics and transformed our concepts of time, space, and matter. Beginning with Einsteins theory of relativity, Motz and Weaver celebrate and savor the twentieth centurys greatest advances in physics, chemistry, and mathematics, each of which have dramatically reshaped modern astronomy. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
